

Two innings matches for junior teams

We have done this a couple of times and when it has been tried the feedback I have got is very positive.

Most A team junior games will be 25-30 overs per side so a B team format needs to run about the same length of time. I think we played 2 innings of 12 overs per innings.

Those that bat in the first innings do not start the 2nd innings meaning that everyone should get a hit. I would restrict bowlers to 3 overs and again those that bowl in the first innings do not bowl in the second innings, therefore 8 bowlers could be used.

The winner is the one with the highest cumulative score. I will be using this format more for Junior B team games this season.
